

Facilities Management Support Services

Supporting the Facilities Management sector

Adler & Allan provides a range of specialist support services to the Facilities Management sector, working with over 50 FM providers nationwide. Areas of expertise include fuel and environmental services, asset resilience, Planned Preventative Maintenance (PPM) and emergency response, helping the UK's businesses and infrastructure organisations keep operational.

FM support service

The Adler & Allan Group boasts a wide range of expertise, ideal for supporting the FM sector. Areas covered, include:

- Planned Preventative Maintenance, of M&E equipment, tanks and general machinery
- Specialist fuel services, including fuel testing, treatment and fuel delivery
- Storage tank cleaning and maintenance
- Disaster response and planning, including flood mitigation and clean-up
- Environmental consultancy, such as contaminated land remediation and pollution prevention
- Forecourt services, including separator servicing and maintenance
- Protective coatings and linings, designed to improve and extend asset life

How we work

Adler & Allan works alongside FM providers, creating long-term partnerships and responding to industry demands so that we can offer a multidisciplinary range of services, to cover the full lifecycle of a business and its assets.

We provide FM support to over 80% of the Telecoms industry, retain 1 Million litres of emergency fuel for UK Data Centres and are available 24/7, 365 days a year to over 40 sites used by London's Emergency Services – these are just some examples of our industry leading FM support services.

Planned Preventive Maintenance (PPM):

PPM is essential to ensure plant and machinery operate correctly, while meeting safety and legislative requirements, such as OFTEC compliance and the Tank Storage Regulations.

Protective coatings and linings:

Designed to extend the life of your assets and save money on unnecessary replacements. Suitable practically any external or internal surface, including tank linings, roofs and floors, Adler & Allan can offer some of the toughest protective coatings, containment linings and asbestos encapsulation available on the market, all of which are on fast turnaround to minimise disruption.

Flood services:

Adler & Allan deliver a total flood mitigation and response services, including Flood Risk Assessments, flood defences, civil engineering works, disaster planning and flood clean-up. JBAR, Adler & Allan's patented modular flood mitigation system is the best on the UK market.

Forecourt services:

Complete forecourt installation, maintenance and decommissioning services, covering fuel tanks, lines, separators and all electrical works. We work with major retailers, petroleum suppliers, forecourt owners and their FM providers.

Emergency response services:

24/7 emergency response and pollution prevention; from minor oil spills to flooding and major industrial disasters. We are the UK's leading spill responder and also provide clean-up services following a pollution event.

Environmental consultancy services:

Keeping Facilities Managers up to date with all relevant legislation and regulations to ensure sites remain clean and safe. We offer environmental consultancy and site audits to help identify risks and prevent pollution.

Contaminated land and remediation services:

Management of all environmental and spill related incidents, designed to reduce costs and minimise liabilities, adhering to Environment Agency and Defra guidelines. Ideal for FMs looking for assistance with Planning Permission or to sell land holdings.

Specialist fuel services:

Emergency delivery available 24/7, fuel polishing, tank cleaning and fuel testing. We have a state-of-the-art, UKAS accredited testing laboratory, delivered by E&S Environmental – the market leader in advanced tank cleaning, Contra Corrosion and fuel polishing technologies.
