Contaminated Land Investigation and Remediation

**For Enquiries &
Emergencies call us
on **0800 592 827****

UK legislation outlines a phased approach to the investigation of contaminated land broadly following the desk study, site investigation and remedial phases. Adler and Allan can help you work through all the phases of a contaminated land site including:

- Conducting a desk study to identify the pollutant linkages and environmental liabilities
- The design, implementation and supervision of site investigations to examine the potential areas of concern identified from the desk study
- Completion of site specific risk assessments for both environmental and human health receptors
- Design and implementation of remedial technologies so as to reduce the impact of the site to the environment via either in-situ or ex-situ methods

Contaminated Land Investigation and remediation

We offer a range of services to help identify the environmental liabilities pertaining to our client's sites or prospective acquisitions or diversitures.

Environmental Site Audit

The audits can be tailored to the client's requirements and can include:

- Site walk overs
- interviews with site personal
- a review of historical documentation
- the inclusion of geological and hydrogeological information
- the search of agency databases for contaminative land uses, environmental incidents and other potentially damaging activities within the vicinity of the clients site.

The accumulation of the information can be used to ascertain potentially harmful, both finically and environmental, concerns before problems can arise and will identify as accurately as possible the source-pathway-receptor linkages present at the site.

We have an excellent relationship with the Environment Agency and regularly represent our clients during meetings with them and Local Authorities.

About Adler & Allan

With highly trained teams, specialist equipment and vehicles, and a nationwide network of depots, we have grown to become one of the UK's leading environmental service providers. The Adler and Allan Group combine unrivalled customer service with capability and competitive pricing.
