

# Tank Inspector

## Video Inspection

The Inspector is a new video inspection system used for underground tanks. This enables the assessment of the interior of underground storage tanks while avoiding costly excavation and dangerous manned tank entry.

The video inspection is performed via flanges with a minimum diameter of 4 inches, comes with a PowerLed of 1000 Lumen and 24 infrared led, which can be used on coated tanks.

## Advantages

- Inspection of underground tanks before, during or after work without the need for opening the manhole
- Complete video inspection kit, which is incredibly compact and easily transportable
- Ability to watch the video inspection remotely and save a copy for further needs
- Battery power operated, which means that there is no need for a power supply or generator on site

## Main Features:

### Protection

- IP67 certified polypropylene suitcase ATEX
- IP67 certified camera case

### Camera

- Resolution of 700TVL with autofocus
- Minimum illumination of 0.01 LUX
- Shutter speed 1/1 ~ 1/10,000s
- 5x digital zoom
- 120dB WDR Filter

### Light

- PowerLed with 1000 Lumen
- Infrared up to 20 metres

### Support

- Adjustable support rod (36-160cm)
- Optional extension

### Other

- Integrated battery charger
- Online streaming connection
