

# Specialist Defence FM Support Services

## ABOUT ADLER & ALLAN

Adler & Allan is the UK's leading expert FM support service provider for Environmental, Technical, Fuel and Specialist Defence FM Support Services. With over 90 years' experience we are committed to innovation and focus on the changing needs of our customers, the always evolving environmental landscape and compliance requirements, which has led to the creation of patented, world class-leading solutions and services.

Our specialist turnkey FM support services tailored to the demands of the defence sector range from 24-7-365 Emergency Response Services, Planned Preventive Maintenance (PPM), Petrol, Oil and Lubricant (POL) maintenance, to providing a range of mechanical and electrical services, asset management, civil engineering, tank and fuel services, including ad-hoc and

reactive servicing and repair, installation works and project management.

We have a dedicated team of specialist technicians, who hold the required site permit passes, have the appropriate security clearances and training to work on military bases and clients across the defence sector, this includes the UK Ministry of Defence (MoD) through the prime facilities management companies on the Next Generation Estate Contracts (NGEC). All works are carried out to current MOD joint service publications (such as JSP317 & JSP375) and relevant practitioner guides (such as PG04/12, PG05/12/ and DMG14 PG06/12).

# Saving on costs, with no loss of operational time

Through our work in the defence sector in the UK and across the world, we've found that it's often the areas requiring specialist knowledge and capabilities that pose the greatest risks to defence organisations.

With our specialisation in areas beyond the scope of the regular FM, we can deliver world-class specialist services to the Defence sector, saving on costs and with no loss of operational time with innovative solutions.

## Areas covered include:

- Planned Preventative Maintenance, of M&E equipment, tanks and general machinery
- Specialist fuel services, including fuel testing, treatment and fuel delivery
- Installation works, covering tanks pipework and heating generators
- Engineering equipment inspections, in-line with relevant standards
- Flood services, including flood mitigation, defences and emergency response
- Cathodic Protection & Protective coatings and linings, designed to improve, protect and extend asset life

Adler & Allan is the UK's leading Fuels Infrastructure maintenance and Emergency Pollution Response Service (EPRS) provider for the UK Ministry of Defence worldwide, our teams are ready to prepare, protect and respond 24/7, 365 days a year.

# Protect

## Cathodic Protection and Protective Coatings

Adler & Allan's corrosion protection division provides specialist services and expertise in the application of Impressed Current Cathodic Protection (ICCP), Sacrificial Anode Systems, and surge prevention.

Cathodic protection combined with our Adalline® polyurea polyurea coating services are designed to provide protection that is guaranteed (via warranty) to prevent leaks and corrosion.

Our Protective Polyurea Coatings protect key assets against deterioration, degradation, structural weakness and significantly extend the life of critical assets and are some of the toughest and most durable protective coatings available in the industry.

# Specialist PPM

## When it comes to protecting your assets, prevention is definitely better than cure

Our Planned Preventive Maintenance (PPM) program include a comprehensive site assessment by specialist engineers who as part of the PPM assessment will generate a full environmental asset list and provide an overview of equipment status.

PPM services delivered to the Defence sector cover:

- Oil storage surveys and maintenance – OFTEC compliance
- Interceptors and site gullies
- Fuel compliance testing & polishing
- Emergency spill response and spill contingency planning
- Emergency fuel Deliveries – 24/7/365

## Emergency Response

**We are the Emergency Pollution Response Service (EPRS) provider for the UK Ministry of Defence worldwide**

Covering the containment and clean up of fuel, oil & chemicals spills throughout the UK and in other specified locations around the world on land and globally in the marine environment.

### **Our emergency spill response contracts include:**

- Oil, chemical and marine response
- Environmental & ecological consultancy
- Hazardous waste / contaminated land disposal
- Pollution prevention / spill control risk assessments
- Accredited spill response training & exercises
- Spill kits, pollution control equipment & maintenance

## MoD & USAF UK and Overseas

**In addition to the MoD, our defence support services are used across 50 armed forces sites worldwide by:**

- US Visiting Forces (USVF)
- Air Force Civil Engineering Centre (AFCEC)
- Naval Facilities Engineering Command (NAVFAC)
- US Army Corps of Engineers (USACE)
- Department of Defence (DoD) through their Prime contractors in the UK and overseas

## Petrol Oil & Lubricant (POL) Services critical to the defence sector

We provide specialist petroleum, oils and lubricant (POL), fuel-management and logistics services.

Delivering a high quality of service and effective solutions for the UK MoD and Defence sector world wide, our teams, are ready to Prepare, Respond and Protect 24/7 all year round.

All works are carried out to current MoD practitioner guides:

- PG05/12 Inspection, Maintenance & Testing of Equipment Installed at Petroleum Installations on MOD Property
- DMG14 Mechanical transport fuelling installations
- PG06/12 Professional Inspection of Fuel Infrastructure and Flammable Dangerous Goods Stores
- PG04/12 Specialist Mechanical Works on Petroleum Installations on MOD Property

We extend our offering with the following POL services:

- Emergency fuel Deliveries – 24/7/365
- Fuel compliance testing & polishing
- Oil storage surveys and maintenance
- Safe and Efficient Fuel Uplift and Transfer

## Specialist defence Infrastructure Services

- Planned Preventative Maintenance (PPM)
- Petrol Oil & Lubricant (POL) services
- Spill Response & Clean-up
- Cathodic Corrosion Protection
- Hazardous Area Electrical works
- Tank installation, Lining and servicing
- Non Destructive Testing (NDT)
- Protective Polyurea coatings
- MARS maintenance & repair system
